Response to Not. Appeal filed 826/03

Prel. Sub. filed 2/26/04

REMARKS

By the present amendment, claims 1 and 2 have been amended to obviate the

examiner's objections thereto and/or to further clarify the concepts of the present invention.

Claims 1-4 and 6 still are pending.

More particularly, claims 1 and 2 have been amended to recite that the flame-

sprayed aluminum alloy has a thickness of 10 to 500 µm. Support for this amendment may

be found on line 11 of page six of the subject specification. Entry of these amendments

are respectfully requested.

It is submitted that this amendment to claims 1 and 2 help to distingusish these

claims over the teachings of the cited patent to Mori et al. In particular, this recitation,

among others, distinguishes the subject claims over the casting comparative example of

the Mori et al patent in which a coarse Si (20µm) is disclosed.

In view of the foregoing, it is submitted that the subject application is now in

condition for allowance and early notice to that effect is earnestly solicited.

In the event this paper is not timely filed, the undersigned hereby petitions for an

appropriate extension of time. The fee for this extension may be charged to Deposit
